

Upstream

Full service for your upstream process – for more consistency, quality, and reliability

As recognized experts for biopharmaceutical process products, we provide everything you need for your upstream process – from high-quality chemically defined cell culture media and feeds to raw materials and special components to customized Cleaning in Place solutions – all from a single source.

We are there to assist you!

In addition to absolutely consistent quality and individual packaging solutions, you benefit from our analytical expertise, our unique EMPROVE® quality and documentation service for raw materials, and fast, reliable support in a close, trustful partnership.
